

Additional security measures for direct flights to JAPAN

During the period stipulated in paragraph 1 of the letter, each country is requested to conduct the additional security measures described in (1) to (3) below at the departure airport for passengers, their cabin and hold baggage for all direct flights to Japan.

In the case that the equivalent or more enhanced security measures are already being conducted in accordance with the national legislation and/or guidance of the originating country, no additional security measures shall be conducted based on the latter.

(1) Passengers including transfer passengers

The additional screening should be conducted for more than 10% of passengers on a random basis. Such screening should be conducted with one or a combination of the following screening methods.

- a) Manual Searches
- b) ETD (Explosive Trace Detection System)
- c) EDD (Explosive Trace Detection Dog / Canine)
- d) Body Scanner / AIT (Advance image technology)

Note: Screening using the appropriate methods shall be conducted for all shoes in which prohibited items could be concealed.

(2) Cabin baggage including transfer cabin baggage

The additional screening should be conducted for more than 10% of cabin baggage on a random basis. Such screening should be conducted with one or a combination of the following screening methods.

- a) Manual searches
- b) ETD (Explosive Trace Detection System)
- c) EDD (Explosive Trace Detection Dog / Canine)
- d) Algorithm-based X-ray (CT, Multi view or Dual view)

(3) Hold baggage including transfer hold baggage

The additional screening should be conducted for more than 10% of hold baggage on random basis. Such screening should be conducted with one or a combination of the following screening methods.

- a) Manual searches
- b) ETD (Explosive Trace Detection System)
- c) EDD (Explosive Trace Detection Dog / Canine)
- d) Algorithm-based X-ray (CT, Multi view or Dual view)
